PROJECTS

July 2020 - September 2020

Rufus - Multipurpose Discord Bot

This Discord bot is built purely on Nodejs. It is hosted on Heroku and is linked to a lot of API's as well as the Memcache database. More details about this project can be found by clicking on the title of the project.

April 2021 - May 2021

Resume Builder Using Python

The Tkinter resume using python is a free and open source resume building software using python. It builds a beautiful and compact resume based on the input given by the user. More details about this project can be found by clicking on the title of the project.

AND MANY MORE

WORK EXPERIENCE

July 2020 - August 2020

Fraydio

Reddit Sales Intern

As a sales and marketing intern on Reddit I had the task to manage pre-built bots hosted on the Heroku cloud platform. Along with this I had to spread a positive image of their app, **Chatterpillar**, on Reddit which improved my communication skills.

EDUCATION

ATHARVA COLLEGE OF ENGINEERING

BTech - Electronics and Telecommunication
(EXTC)
